

OMEGIS^{TM/SM}

Private AI Reasoning Engine

Your company's AI, built exclusively for you.

Want to integrate AI into your business but **don't know where to start?**

Generic AI tools like ChatGPT don't understand your business, voice, or confidential data.

OMEGIS^{TM/SM}, built for your company, changes all that:

- Ingests all your company's proprietary knowledge, from scattered files, internal servers, & the cloud.
- Uses the latest AI technology without leaking confidential data.
- Provides context-aware answers and workflows tailored to your business.

Security You Can Trust

- Built atop Amazon AWS Bedrock or Microsoft Azure, or deployed on-premises with open-source AI models.
- Uses a private cloud with encryption-in-use and user-level permissions.
- Includes audit logs for full visibility into model behavior and user interactions.
- Multi-layer defenses against prompt injection, data poisoning, and malicious inputs.
- Secure connections to cloud & hybrid storage including Google Drive, OneDrive, SharePoint, Box, and internal NAS systems.
- Built-in model hardening reduces hallucinations and improves response reliability.

Accessible Options

- Chat interface (desktop + mobile)
- Browser-based search and workflow nodes
- Admin dashboard for access control & monitoring
- APIs integrate into your existing stack

Why OMEGIS™/SM ?

ROI You Can Prove

- Replace generic ChatGPT queries with company-specific intelligence.
- Create a company-wide brand “voice” tailored to your content.
- Eliminate data-dumping into public AI tools.

Competitive Advantage

Stop training the competition

Your data never feeds public models.

Own your intelligence layer

OMEGIS™/SM is exclusive IP for your company.

Outpace competitors

Sharper messaging, fewer mistakes, and faster workflows.

Implementation Roadmap

1. Discovery

Audit knowledge sources, tools, and workflows.

2. Prototype

Your own OMEGIS™/SM within 60 days, focused on a high-value use case.

3. Expansion

Add integrations, refine knowledge, scale to departments.

4. Optimization

Continuous tuning as new data and workflows evolve.

About Theta Tech AI

Theta Tech has over a decade of experience architecting and deploying advanced AI systems- from custom machine learning algorithms to the integration of today’s most powerful AI agents. Our team has built solutions across healthcare, finance, manufacturing, and professional services, delivering precision systems that scale.

We combine deep technical craftsmanship with a strategic focus on business outcomes. That means not just building code, but ensuring your AI layer drives measurable ROI, efficiency, and competitive advantage.

Whether you’re a fast-moving startup or a Fortune 500 modernizing legacy systems, Theta Tech is the partner that transforms AI hype into operational reality. With Theta, you’re not buying tools - you’re building the intelligence core of your business.

Private AI that actually understands your business.

Example Use Cases

Sales & Marketing

Generate client proposals in minutes, aligned to your brand voice.

Operations

Instantly answer employee questions from SOPs and policies.

Customer Support

Automate tier-one responses, escalate complex cases only.

R&D / Product

Query internal notes and test results without sifting through files.
